What Mr. Shadey and His Family Drink

By James Lowery

All of the following 39 flattened cans were found at one location on August 4, 2009, just upstream of the Elder Street Bridge where we water test. This was my personal record for the number of flattened cans found at one time at one spot. Strangely, only flattened cans are found at this location, probably because the runoff from the Eastwood Village Shopping Center parking lot enters the creek here.
